Hoppers

Psyllids

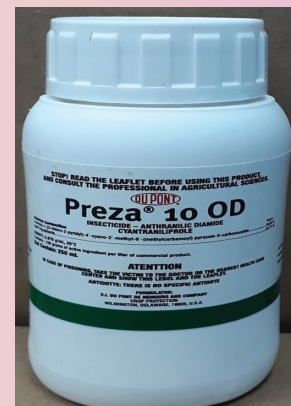

Aphids

Thrips

Lepidoptera

PREZA® FORMULATION PROFILE

Preza® is designed for foliar applications to optimize leaf penetration and spray coverage.

- Formulation based on vegetable oil (dispersion in oil = OD)
- Optimized for foliar applications
- Giving a consistent translaminar action and local systemicity
- Consistent and fast crop protection.

Note: Preza® is designed for foliar applications and is not suitable for soil applications

PREZA® EFFECTIVE ON A WIDE RANGE OF CROPS

- Fruiting vegetables
- Cucurbits
- Brassica
- Leafy vegetables
- Bulb vegetables
- Citrus
- Pome fruit
- Stone fruit
- Bushberries
- Tree Nuts

PREZA® APPLICATION

DOSE: Use 5ml per gallon of water and spray onto the leaves of the plants. Make two treatments at 14 day intervals and then alternate with another product of different mode of action MoA.
